| Title: | Children & Young Peoples Services at United Lincolnshire Hospitals NHS Trust (ULHT) Risk to the sustainability of the Service | | |
| Author/Responsible Director: | | | |
| Dr Neill Hepburn, Medical Director | | | |
| Purpose of the Report: | | | |
| <p>This paper has been developed as a response to the significant challenges faced by the Children & Young Peoples Services (C&YP), which also have clinical interdependencies within Neonatal and Maternity Services at United Lincolnshire Hospitals NHS Trust (ULHT). The acute service is compromised within the middle grade doctors rota and the consequence of not being able to provide a safe, quality and consistent rota, which will effect the provision of the C&YP, Neonatal and Maternity Services at the Pilgrim Hospital site, Boston.</p> <p>This paper asks the Trust Board and Divisions across the trust to continue to work with W&C Directorate to ensure the continuation of a safe service for children for paediatric inpatient services at both Lincoln County Hospital and Pilgrim Hospital Boston.</p> <p>The paper goes on to provide an update to the actions currently in place and the options available to consider and recommend for the immediate mitigation of the imminent risks to the current C&YP Services, until a longer term strategic direction can be confirmed.</p> | | | |
| The Report is provided to the Board for: | | | |
| Information | X | Assurance | X |
| Decision | X | | |

Summary/Key Points:

- The C&YP Services provided at Pilgrim Hospital cannot be sustained in their current form beyond 31st July 2018 unless additional middle grade doctors can be found to fill significant gaps in the rota.
- The issues with the middle grade rota at Pilgrim for Children's Services will also impact on the Obstetric (Maternity) and Neonatal services at Pilgrim Hospital, which will no longer be sustainable from 31 July 2018 unless additional medical cover can be found to cover the middle grade rota.

The paediatric directorate situation remains that;

- There is a continued deterioration in medical staffing rotas at Middle Grade, Junior doctor level and Nursing in Paediatrics and the medical and nursing rotas remain under stress at both acute sites. With effect from 31 July 2018, it is expected that there will be only 1.0 substantive whole time equivalent (wte) middle grade doctor on the rota at Pilgrim out of an establishment of 8.0 wte.
- A new Trust wide rota is being developed and negotiated with the Consultant body.
- National and international recruitment is still being pursued by the Women & Children's Clinical Directorate (W&CCD), but, as in previous reports has failed to produce significant results to support the rota.
- The Clinical Directorate continue to work with medical agencies, irrespective of financial cost, to find agency and locum medical staff to support the rota at Pilgrim in order to keep Children's Services running safely.
- There is concern raised by the Consultant Paediatric Medical Team of the safety relating to a potential middle grade medical rota, if recruitment of locums was possible, where 7.0 wte out of an establishment of 8.0 wte are locum/agency doctors.
- The paper includes a Quality Impact Assessment of the proposed model, (appendix 4) and also includes an Equality Impact Assessment for consideration.
- A twice weekly Task and Finish Group, chaired by the Project Director, has continues to develop the work required to mitigate the current risks and ensure the safe and sustainable running of C&YP, Obstetrics and Neonatal Services at ULHT. Oversight of this work will be through the Clinical Management Board.

Recommendations:

- Trust Board is asked to consider carefully the risks raised in this paper relating to the medical and nursing challenges that will significantly increase over the coming months.
- The Trust Board is asked to consider that the actions in place are consistent with

the Trusts vision of “one team, two sites” and that the proposed model of care, project mobilisation, project governance and contingency planning process is acceptable.

- Trust Board is asked to consider each element of the model that has been discussed in this paper for mitigating the immediate risks relating to the medical staffing challenges.
- The Trust Board is also asked to consider recommending a full work up a contingency plan with implementation plans as mitigation in the event of a failure of delivery of the proposed model.
- To agree with the recommendation that once the proposed model has been agreed, that the use of option terminology is ceased and that the terminology going forward refers to the “planned model “and /or the “contingency plan”.

REPORT TO TRUST BOARD – 29TH JUNE 2018

1. Background

Women & Children clinical directorate have been managing the significant medical and nursing staff vacancies for a number of years within paediatrics. The medical staffing issues have escalated in recent months resulting in the Trust, in conjunction with partners, being required to potentially change staffing levels and clinical pathways to ensure the continuing safe service at both Lincoln County Hospital (LCH) and Pilgrim Hospital Boston (PHB).

Paediatric nursing and medical staffing rotas are fragile with a number of consultants 'acting down' both in and out of hours to ensure adequate medical cover due to vacant middle and junior doctor posts on both sites. The number of operational, in-patient beds at PHB has previously been reduced to 8 from 12, in February 2018 and subsequently reinstated back to 12 in June 2018. This model is not sustainable and has been mobilised as a short term measure. A longer term solution is required, albeit with a different model to maintain Paediatric services at both locations.

Due to the importance of messages reaching a wide public audience, the Trust and directorate, a comprehensive communications plan will be devised and implanted to ensure that a single, accurate message goes into the public domain.

The formal project to ensure that engagement with staff, agreement of pathways and the sharing of information has commenced within a timescale which coincides with Health Education East Midlands, middle grade doctor rotation.

2. Purpose of the Report

This report is intended to update the Trust Board of progress to date and the potential impact of the changes in staffing deployed across the Trust.

3. Body of report

In preparation for the implementation of the new model, a number of actions have been taken:

1. **Mobilisation** has been established - a working group with agreed terms of reference is in place. This is a weekly internal working group attended by the Paediatric clinical leadership team, directorate team and internal support functions to update on progress, review and resolve the risks and cross divisional issues.

- 1.1 As a result of the Paediatric Stakeholder Review Meeting on 8th June 2108, a "Supergroup" was convened, attended by The Trust, NHSI, HEEM, NHSE Specialised Commissioning and CCG, in order to identify workable solutions, create an operational model in the short

timescale required

2. **Governance** - A project oversight group, with external partners that includes CCGs, EMAS, NHSI and HEEM representatives has been constituted to provide strategic direction once the options have been identified, this group to discuss impact and agree plans to mitigate the identified risks.
 - 2.2 There is a formal, strategic project plan, annexed to the project plan is an audit trail which details all decisions made, when and by whom / group. Additionally, all relevant risks and mitigations are cross referenced to the risk register in order to “close the loop” in terms of governance assurance.

- 3 **Activity** - Patient flow, capacity and demand modelling has taken place and fed into the proposed model (appendix 1), demand modelling (appendix 6). It is proposed that Pilgrim hospital is configured;
 - 3.2 8 x bedded Paediatric assessment unit open 24 hrs, co-located with the neonatal unit,
 - 3.3 Paediatric outpatients
 - 3.4 4 x day surgery beds
 - 3.5 Neonatal – managed at 34 weeks gestation - 8 x SCBU cots, 2 x transitional care cots
 - 3.6 Consultant led maternity unit
 - 3.7 Gynae inpatient ward

- 4 **Contingency Plan** - two elements of the plan are worked on;
 - 4.1 Estates and Facilities have enacted the required building works necessary to accommodate a contingency plan which may involve centralising some services at the LCH site and to ensure the facilities will be, if required, fit for purpose.
 - 4.2 Business Continuity plans are to be drawn up in two ways;
 - 4.2.1 Planned – protocols and escalation processes are being developed to ensure that any changes to the rota or cover are managed in an effective and timely manner. I.e. rota compliance will be monitored weekly, any gaps to be covered with the use of a Consultant led shadow rota, which would ensure that the gap is covered by the site team with any additional cover required by the other site team.
 - 4.2.2 Unplanned – i.e. sickness notified in day. The shadow rota will be utilised in line with an escalation protocol.
 - 4.2.3 Service failure escalation – An escalation protocol is being drafted which identifies immediate action based on;
 - 4.2.3.1 One day (no staff report for duty) – actions clearly identified
 - 4.2.3.2 Two days (no staff report for duty) – further actions identified

- 4.2.3.3 One week (lack of staff) – action plan creation which feeds into planned protocols and escalation
- 4.2.3.4 One Month – escalation to crisis meeting chaired by Executive Team in line with existing Trust major incident plan .

5 Communications Plan - General and individual staff meetings / sessions are to be held, in line with the communication plan (Appendix 3) and will continue throughout the period of change with support from HR.

5.1 The communications strategy is required which is specifically aimed at aimed at;

- Patients – to emphasise that the service will remain at Pilgrim, albeit with a different model of care,
- Staff - to emphasise that the service will remain at Pilgrim
- Partners – all stakeholders (health partners, local Councillors / MPs, public, education institutions).

5.2 There is a considerable confusion for patients and all stakeholders both internally and externally regarding the use of “option #” to explain the service going forward. It is recommended that once the model has been agreed, that the use of option terminology is ceased and that the terminology going forward refers to the “planned model “and /or the “contingency plan”. This change will illustrate to all audiences that the scoping element of the programme has been completed and that the resolution phase is in place.

6 **Quality Impact Assessment** (QIA), appendix 5, has been updated following stakeholder comments and the details of the project plan.

7 **Minimising Risk** - A number of specific actions to minimise risk are being considered in the model generation to ensure that the service remains safe for patients;

- Modelling is being undertaken on the principle that women and children who present to Pilgrim will be seen and assessed there. The public will not see a difference or have to behave differently as the vast majority of activity will remain and will not change. Approximately 98% of children seen and treated at Pilgrim on a daily basis will continue to be managed there.
- Outpatient clinics will continue to be offered at the Pilgrim site and may be, as a result of the new operational model, additional outpatient clinic activity to alleviate inpatient activity on the wards.
- PHB will manage low risk neonates e.g. above 34 weeks,
- A children’s assessment and observation unit to be open 24/7, consisting of 6 x beds, providing restricted periods of observation

(e.g. up to 8- 12hrs). Any needing longer periods of observation will be transferred to Lincoln,

- The aim of the model is to define a service where risk is reduced and workload manageable with 1 x tier 2 doctor resident overnight, covering the ward and neonates,
- Evening presence of consultants is essential at both Lincoln County and Pilgrim as peak periods of activity, this will require a minimum of 8 consultants at each site. The presence of consultants will give assurance to HEEM regarding suitable supervision

8 **Timescales** - This is a proposed short term model to manage the current situation that fits with the STP plan in terms of service delivery. There are three timelines:

- June 2018 to 1st August 2018
- 1st August to end of year
- Longer term

9 **Workforce** - It is likely, that in order to ensure that the service remains safe and sustainable that the workforce plan will require significant change to staff the model as described in Appendix 1.

9.1 Detailed medical staff rotas, with named doctors were requested by the Stakeholder group at the meeting on the 22nd June. NHSI requested this be completed by 29th June,

4 **Actions Required**

- The Trust Board to recognise and endorse the formal project, risk register and audit trail will be maintained to provide assurance to all stakeholders
- The Trust Board are aware of the timelines and implementation of the short, medium and longer term models and agree the proposed operational model for paediatric inpatient services
- The Trust Board are appraised of the public and stakeholder communication plan
- The Board to agree with the recommendation that once the model has been agreed, that the use of option terminology is ceased and that the terminology going forward refers to the “planned model “and /or the “contingency plan”.
- Continuation of the positive cross divisional planning and working.

Dr Neill Hepburn
Medical Director

Appendix 1

Proposed Model

Women, Children and Young People's services United Lincolnshire Hospital – 1st August 2018

Pilgrim Hospital Boston

- Paediatric Services
 - 8 Bedded Paediatric Assessment unit 24 hours
 - 24/7 support for ED
 - Co- located to neonatal unit
 - Paediatrics ambulatory care – assessment and observation
 - Paediatric Out patients
 - 4 beds – Day surgery – weekday/daytime
 - Open access, CYP with complex conditions – individual plan

- Neonatal Services
 - SCBU (8 Cots)
 - Transitional Care (2 cots)
 - Gestation > 34 weeks
 - Transfer back supported

- Obstetric Services
 - Consultant led maternity unit
 - Midwifery led maternity unit
 - OP maternity services

- Gynaecology Services
 - 24 hour - In Patient Ward (IP & Day case)
 - Ambulatory and OP's

NURSE STAFFING

- Paediatric Services
8 bedded Assessment Unit

- Neonatal Services
8 bedded level 1 unit
2 transitional care beds

- Obstetric Services
- Gynaecology Services

Lincoln County Hospital

- Paediatric Services
 - 24 hour - In Patient Ward (Medical & Surgical & Day case)
 - Level 1 2 x Beds [non ventilated PHDU care only]
 - 14 hour - Assessment unit (9.00 am to 11.pm - 7 days per Week)
 - Out patients
- Neonatal Services
 - Local Neonatal unit (16 Cots)
 - Transitional Care
- Obstetric Services
 - Consultant led maternity unit
 - Co-Located Midwifery led unit
 - OP maternity services
- Gynaecology Services
 - 24 hour - In Patient Ward (IP & Day case)
 - Ambulatory and OP's

Community & Support Services

- Radiology
 - Onsite Paediatric & Interventional Radiology (For obstetrics) is only available on LCH site
- Community Midwifery
 - Community Midwifery
- Transportation Service (Specifications required)
 - Emergency Retrieval Team (Minimal)
 - Transport for semi-urgent transfers

- Community Paediatric Nursing
 - Managing Acute illness at home
 - Trauma & Post-Operative Care
 - Long Term Conditions
 - Children's Cancer Care
 - Continuing Care
 - Palliative, End of Life & Bereavement
- C&YP Rapid Response Nursing Team **(new service required)**
 - Admission avoidance
 - Early discharge support
 - Single point of Access & Coordination

Appendix 2

Paediatrics and obstetrics engagement plan

1. Objectives

As we develop plans for the future of paediatric and maternity services across Lincolnshire, it is vitally important that we provide the opportunity for our patients and public to input into the process.

Strong public engagement on this subject will:

- Shape the direction of travel
- Help us to develop service models that meet both the needs and expectations of our patients
- Understand what the impact of the changes will have on patients and their families, to then mitigate against impacts.
- Help our public to understand and support any changes
- Meet legal duty to involve

2. Key audiences

Engagement on this subject should primarily be with the users of current services, but will also include other local residents, interested parties and stakeholders.

Engagement needs to be done on a number of levels to ensure everyone gets a voice. This will range from focussed meetings with special interest groups (youth councils, Young people's groups, charitable organisations and groups representing children and families of children with health needs, campaign groups) to broader engagement with the wider population through surveys, social media and street engagement.

3. Key messages

- In May, ULHT Board committed to continue to run current paediatric and obstetric services at Pilgrim beyond 1 August as long as safety can be maintained.
- Since Board, all partner organisations, local and national, have committed to supporting the Trust, and to the continued provision of paediatric and obstetric services at Pilgrim.
- There are no plans to close paediatric or obstetric services at the hospital.
- ULHT has a moral duty to prepare for the worst. Alongside this, the Board also agreed to develop a full contingency plan to temporarily move paediatric and obstetrics services by 1 September to Lincoln if needed in case the safety of current services cannot be sustained.
- We don't know what the short to medium term model at Pilgrim will look like, but what we do know, is ULHT's primary focus will be on keeping paediatric and obstetric services at Pilgrim.
- The service is likely to look different due to the challenges the Trust faces in recruiting and retaining paediatric staff.
- We will engage people on developing these service models.
- All partners have committed to support the Trust in maintaining services and a small group of key partners agreed to work with the Trust to quickly develop plans to provide safe paediatric services at Pilgrim Hospital.
- No decision has been made and any changes will be temporary.

- Pilgrim hospital has a bright future and our aim is to have both paediatric and obstetric services at Pilgrim if we can get the staff.
- These temporary options are not linked to the Sustainability and Transformation Partnership. This is about maintaining safe paediatric services at Pilgrim and Lincoln hospitals for our patients now.
- This is nothing to do with money, it's only about patient safety.

4. Engagement carried out so far

Over the last two years, ULHT and STP partners have engaged the population of Lincolnshire on the future of women and children's services. This has included a mix of qualitative and quantitative techniques to reach harder to reach people and a wider representation of the population.

In total, we've engaged more than 2,500 people on paediatric and maternity services. We have spoken to over 130 parents in face-to-face meetings specifically about paediatric and maternity services over the past 18 months, as well as a further 1,000 people about our 2021 strategy, which has included discussion on maternity and paediatric services.

In addition, more than 800 people responded to our 2021 strategy survey in 2017, and comments around paediatrics and maternity in particular were collated.

We have also run staff briefings across hospital sites since April 2018 to keep staff updated on the ongoing staffing situation within paediatric services, attended a number of public meetings arranged by campaign groups and discussed the situation with ULHT members at our members forum meeting on Monday 14 May.

A survey is also currently underway asking specific questions about experiences and expectations of childrens, young peoples and maternity services. This has been shared via social media, through our paediatrics and members newsletters and also via partners and stakeholders.

The survey has so far attracted 561 responses. A full report on the results will be available in the coming weeks.

A survey is also being carried out currently by the Royal College of Paediatrics and Child Health (RCPCH) to inform their review of childrens' services in Lincolnshire's hospitals. The results of this survey may also be used to inform our work.

5. Summary of views of patients and the public

The main themes from all of this engagement so far were:

Paediatrics

- Parents generally have no issue with their child being transferred away from their local hospital for specialist non-emergency treatment.
- In an emergency, some would expect child to be stabilised locally first
- No consensus on travelling for emergency care – some expected this to be provided locally, yet others would travel an hour to receive care for their child
- Some are concerned about safety if they needed to travel in an emergency/ feel that centralising services will cost lives
- Generally parents praise the staff, nurses and doctors at Pilgrim. They feel the medical staff are helpful and caring.

- In case of emergency, the majority of parents take their children to A&E in Pilgrim. Few said they called 111 and followed the process. Very few tried to get an appointment at GP surgery, which seemed to have been a challenge.
- In case of emergency, most parents say they wouldn't mind their child being seen by a nurse or GP instead of consultant as long as they were trained appropriately.
- Outpatients appointments – preferably local hospital however prepared to travel for specialist appointments; to be seen by a specialist with paediatric background.
- Inpatient stay – majority of parents would expect to be admitted to local (Pilgrim) hospital. Some families had to travel to Leicester or Nottingham. They would expect paediatrician to care for their child at all times.
- Most agreed that emergency paediatric care needs to stay in Boston.
- A handful suggested that if you centralise maternity and paediatric service, there needs to be a way for partners and other children to stay overnight with you.
- There was a concern around lack of paediatric provision for holidaymakers on the East Coast at peak times
- Need proper consideration for children with special needs who need stability and familiarity, as well as those with heart conditions, epilepsy, chronic asthma and bleeding disorders who need immediate attention.
- Worry that if we centralise, more children will be sent out of county for care as Lincoln won't be able to cope with the numbers. Some expressed concern about poor reputation of Lincoln paedics service.
- Issues with travelling for care if family has no car- public transport can be difficult
- Patient transport needs to keep pace if services are centralised.
- It is very difficult to get a GP appointment so people end up going to Pilgrim A&E.

Maternity

- Most women said they accept going out of county for very specialist care if baby is born early/ needs a certain level of care.
- Boston mums said they worry about having to travel for maternity care more often- cost, stress, appointment times (difficult to get to early appointments if they are far away)
- The overall feeling was that Lincoln maternity could not cope if everything was centralised there.
- Many people in the Boston area said they are worried that babies will die if there isn't a consultant presence at Boston.
- A large number of women said they would not use a midwifery-led unit at Pilgrim. Too scary and something might go wrong. Expect pain relief and consultant care close to home.
- Every woman spoken to said they would like maternity scans, antenatal appointments and check-ups locally.

Views of protected groups

- People may rely on taxis to get to hospital, not affordable for those on low incomes
- Low social-economic backgrounds will rely on ambulances alone, so will be disadvantaged compared to those with transport.
- Number of parents do not own a car therefore they have to rely on public transport.
- Eastern European mums expect to be admitted to hospital earlier to give birth, more availability of c-sections and less focus on natural birth. They want a doctor present for all births.

6. Plan

Going forward, we plan to continue engagement around maternity and paediatric services countywide, jointly as an NHS system.

The plan is informed by the actions in the equality impact assessment and will be targeted at those groups adversely affected by any potential changes and in one of protected groups.

The findings of this engagement activity will inform future equality impact analyses for any short-term service change that may take place as a result of staffing shortages, as well as informing long-term planning for the future delivery of paediatric and maternity services.

As before, this engagement will take a number of forms to ensure all engagement is two-way and enables us to gather people's ideas and input to shape future models. This approach will include surveys, social media engagement, attendance at group meetings, focus groups and street engagement in public areas. Attendance at public meetings for information sharing is not within the scope of engagement activity.

All activities will be led by NHS communications and engagement team members, with clinicians where possible/ necessary.

We will continue engagement using the questions already in use (Appendix A) but as we gauge the ongoing impact of any change they may alter.

In addition to this public engagement, we will continue ongoing engagement with our stakeholders listed above.

7. Engagement activity

Group meetings- The table below outlines the groups that have been identified as possible contacts for engagement meetings, and where meetings have already taken place. Where this is the case, we propose to continue an ongoing dialogue as service models develop, to test options, preferences and mitigating factors.

We also intend to continue identifying relevant groups to contact and visit, particularly focussing on young people's groups and third sector/ support groups for children with health needs and their families (asthma support groups, disabled children's groups, epilepsy support groups etc)

| Groups contacted | Done | Date planned |
|---|------|--------------|
| NCT Spalding and Boston (Black Sluice café) | | |
| NCT Lincoln | | |
| Boston Baptist Church toddler group | | |
| Honeypot toddler group | | |
| Black Sluice NCT Boston | | |
| Boston Youth Council | | |
| Grantham college | | |
| St Thomas Parent & Toddler Group | | |
| Swineshead pre school | | |

| | | |
|---|--|----------------|
| Wyberton Play School | | |
| Rosebery Avenue Community Playgroup | | |
| Totschool Spilsby | | |
| Little SNAPPS group | | By end of July |
| Fishtoft Road childrens centre | | |
| Norfolk Lodge children centre | | |
| Norfolk Lodge childrens centre - International group | | |
| Norfolk Lodge childrens centre - baby and toddler groups | | |
| Sutterton childrens centre - baby explorers | | |
| Sutterton childrens centre - toddler explorers | | |
| Skegness childrens centre | | |
| Alford childrens centre | | w/b 25.6.18 |
| Horncastle childrens centre | | w/b 2.7.18 |
| Caistor childrens centre | | |
| Market Rasen childrens centre | | |
| Binbrook childrens centre | | |
| Louth childrens centre | | |
| Holton le Clay childrens centre | | |
| Tattershall childrens centre | | |
| Bardney Parent and Toddler Group *Friday from 9:30-11:30 | | |
| Tiny Tots Horncastle *Tuesday and Thursday at the Methodist Hall 9:45am to 11:15am. | | |
| Sunbeams Mum's & Toddlers Group Louth | | |
| Legbourne Community Centre, Legbourne, Louth *Friday mornings, 10:30am - 11.30am, term time only | | |
| Little Fishes - Woodhall Spa *Tuesdays at 09.30 to 11.00am | | |
| Scopwick and Kirkby Green Parent and Tiddlers Tuesday Mornings 10.00 till 11.30 a.m | | |

| North Thoresby Early Years Group | | |
| Scotter Parent & Toddler Group *Tuesday: 1.30pm - 3.00pm | | |
| Little Angels Toddler Group Wragby *Monday mornings, 9am to 11.30am term time only | | |
| Old Leake childrens centre | | |
| St Christophers childrens ecntre | | |
| Butterwick Parent and Toddler Group | | |
| Revesby Toddler Group at Red House | | |
| Rompers Mother & Toddlers | | |

| | | |
|--|--|---------------|
| St Thomas Parent & Toddler Group *Every Tuesday, 9:30am - 11:30am | | |
| Mablethorpe childrens centre | | |
| Spilsby childrens centre | | w/b 9.7.18 |
| Wainfleet childrens centre | | |
| Burgh Le Marsh Pram & Toddlers *Wednesday 10.00 - 12.00 noon (2nd, 3rd & 4th in the month) | | |
| Spilsby - Come and Play Toddlers *Mon and Tue 10:00- 11:30 | | |
| Spilsby -Great Steeping Parent & Toddler Group *Thursdays 1.30 - 2.50pm | | |
| Halton Hologate Parent & Toddler Group | | |
| Partney Parent & Toddler Group | | |
| Spilsby Pavillion Parent & Toddler Group *Fridays 10 - 11.30am | | |

Workshops - We propose an approach to engagement that gets a group of interested parties in a room to discuss particular issues, approaches to service delivery and mitigating factors to gather meaningful constructive feedback. This will be facilitated jointly by engagement staff and clinicians.

It is proposed that these will be convened with the help of partner organisations, third sector support, inviting members of the above listed groups, advertising among NHS membership and through social media promotion.

The vision would be to have a discrete group each session, working together on one subject area to offer opinion and help shape services.

Public meetings- We will arrange a series of public meetings, hosted by us, to allow us to share our developing plans and offer the public the chance to input into the development of these.

These meetings will be hosted by ULHT, with execs and clinicians making up a panel to present on background, developments and current thinking. There will then be the opportunity for the public to ask questions of the panel and offer their feedback.

These structured meetings will enable us to gather public opinion and feedback in a constructive way.

These meetings will begin from w/b Monday 2 July and take place at locations across the Boston and East Coast area, both during the daytime and in the evening.

Street engagement- To ensure that our engagement reaches not only the actively interested but the wider population of the towns and villages that we serve, we propose a range of street engagement activities.

Engagement leads will place themselves in high-traffic public areas where they can speak to people and gather opinion and feedback using structured questions/ survey questions. The areas where this could be done include outside schools/ children's centres, shopping centres, high streets and at public events.

Appendix 3

Engagement questions

The structured questions used during this engagement:

1. Do you have experience of using paediatric (children's) or maternity services in Lincolnshire's hospitals?
2. If so, which services?
3. What is your opinion and experience of paediatric services provided in Lincolnshire's hospitals? (answer in relation to accessibility, quality of care, staffing, variety of services provided, specialism covered)
4. What is your opinion and experience of maternity services provided in Lincolnshire's hospitals? (answer in relation to accessibility, quality of care, staffing, variety of services provided, specialism covered)
5. If your child was ill in an emergency, where would you first expect them to be seen and by whom?
6. If your child had an outpatient appointment, where would you expect them to be seen and by whom?
7. If your child had an inpatient stay, where would you expect them to be cared for and by whom?
8. If you needed antenatal care whilst pregnant, where would you expect to receive it?
9. If you were having a baby, where would you expect to give birth?
10. What are your specific concerns around the possible centralisation of paediatric services?
11. What would relieve your concerns/ mitigate?

Appendix 6

Quality Impact Assessment (QIA)

| | |
|---|--|
| Title of scheme/ project/programme: | Consolidation of Paediatric Services due to Workforce Challenges at ULHT potentially impacting on Neonatal and Maternity Services. |
| SRO | Tracy Pilcher |
| Lead CCG: | Lincolnshire East CCG |
| CCGs involved: | LECCG, LWCCG, SLCCG, SWLCCG |
| Author: | Penny Snowden |
| Brief summary of scheme/project/programme: | The paediatric service at ULHT is facing significant medical staffing challenges impacting on the middle grade rota. Subsequently, there is a real threat to sustaining paediatric services at Pilgrim which has the potential to destabilise neonatal and maternity services as well as impacting on the care of children in Accident and Emergency. There will also be a loss of paediatric life support in the case of suddenly unwell children in other areas of the hospital. |

| Area of Quality | P/N or N/A | Risk score (if N) | Comments (reasons for identifying impact as positive negative or neutral) | Risk>8 Y/N If Yes complete stage 2 assessment tool |
|--|-----------------------|--------------------------|---|---|
| Duty of Quality <ul style="list-style-type: none"> Compliance with NHS constitution Impact on partner organisations Impact on organisations duty to safeguard children and vulnerable adults Impact on other services within the organisation <p>Any other risk indicators relevant to the Duty of Quality:</p> | N N N N N | 25 | <p>Service redesigns impacts on the Lincolnshire Population of Children and Young People. In the case of maternity , potentially 1300 mothers may access maternity care outside the county</p> <p>Significant impact on neighbouring Trusts in terms of displaced activity</p> <p>Increased journey times and the absence of public transport impacts on access of services for children including those with disabilities.</p> | Yes |
| Patient Safety <ul style="list-style-type: none"> Impact on patient safety Impact on avoidable harm | N N N | 25 | <p>Increased reliance on EMAS to transport greater distances who</p> | |
