

# **UNITED LINCOLNSHIRE HOSPITALS TRUST**

## **INTEGRATED PERFORMANCE REPORT**

**PERIOD TO 28 FEBRUARY 2017**

## Document management

**Title:** Integrated Performance Report

**To:** Trust Board

**From:** Rachel Harvey, Head of Planning & Performance

**Author:** Katherine Etoria, Planning & Performance Manager

**Date:** 4<sup>th</sup> April 2017

### Purpose of the Report:

To update the committee on the performance of the Trust for the period ended 28<sup>th</sup> February 2017, provide analysis to support decisions, action or initiate change and set out proposed plans and trajectories for performance improvement.

### The Report is provided to the Board for:

Decision	x	Discussion
Assurance	x	Endorsement

Page 3

Page 4

Page 5

Page 6

### Recommendations:

The Board is asked to note the current performance and future performance projections. The Board is asked to approve action to be taken where performance is below the expected target.

This is an evolving report and the Board are invited to make suggestions as we continue to develop it.

<b>Strategic Risk Register</b>	<b>Performance KPIs year to date</b>
<b>New risks that affect performance or performance that creates new risks to be inserted here.</b>	<b>As detailed in the report.</b>

<b>Resource Implications (e.g. Financial, HR)</b> None
<b>Assurance Implications:</b> The report is a central element of the Performance Management Framework
<b>Patient and Public Involvement (PPI) Implications</b> None
<b>Equality Impact</b> None
<b>Information exempt from Disclosure</b> None
<b>Requirement for further review?</b> The Integrated performance dashboard will be updated on a monthly basis.

## Integrated Performance Report for the Period to 28<sup>th</sup> February 2017

1. Executive Summary for period of 28 <sup>th</sup> February 2017 .....	4
2. Integrated Performance Report.....	5
3. Detailed Trust Board Performance Dashboard.....	6
4. “Priority deliverables” – .....	30
Referral to Treatment .....	30
Diagnostic Waits.....	35
Cancer Waiting Times (62 Day) .....	37
4 Hour Wait (A&E).....	41
Sickness Absence.....	51
Vacancies.....	55
Staff Engagement (Staff Appraisals).....	64
Core Learning .....	67
5. Summary of “Priority deliverables” – Performance against STF Trajectories.....	70
6. Risks and Recommendations .....	71
7. Equality Analysis Statement .....	72
Appendix 1. Monitor Risk Rating.....	73
Appendix 2. Glossary.....	74
Appendix 3. Overview of thresholds for Red, Amber, Green ratings .....	75
Appendix 4. Detailed thresholds for Red, Amber, Green ratings .....	76

## **1. Executive Summary for period of 28<sup>th</sup> February 2017**

### **February headlines:**

- ☒ 4 hour waiting time target – performance of 75.22%
- ☒ 3 of the 9 national cancer targets were achieved in January 2017
- ☒ 18wk RTT Incomplete Standard –February performance was 88.27%
- ✓ 6wk Diagnostic Standard –February performance was 99.72%
- ☒ Agency Spend – £2,804k
- ☒ Financial Improvement Plans - £-1,109k

### **Successes:**

31 Day subsequent treatments surgery achieved the standard two months in a row in December and January (cancer is reported a month behind).

Diagnostics met the standard three months in a row with a 0.5% improvement since January. There is a pilot ongoing around a new booking that will reduce the time from referral to diagnostic test. Funding to support reducing CT waiting times has also contributed to sustaining performance in this area.

Sepsis performance has improved over a four month period in particular at Lincoln. Further work is being progressed to ensure remedial action plans provide impact on all sites and this will be presented to the Sepsis Task and Finish Group.

Core learning increased again last month and is now at 90% with an upward trend. This will impact on safety and quality as a result of more staff being competent with key learning being completed.

Staff turnover continues to be within tolerances and there is evidence to support increased staff retention: January performance was 7.21% and February, 7.05% showing a decrease in turnover.

### **Challenges:**

Cancer 62 Day performance has deteriorated in month although some tumour sites are improving such as Breast and Head and Neck. In comparing our performance against our peer group there are signs of deterioration in some other Trusts but this is not shown in all peers, for example Norfolk and Norwich improved their performance in month.

A&E performance to date is 76.91% with year to date performance being 79.18%. Some of the key factors affecting the anticipated performance improvement as a result of initiatives such as Red to Green at Lincoln and Pride and Joy at Pilgrim are increasingly variable shift cover with new locums completing single shifts and vulnerability in medical staffing due to locum sickness or last minute absences creating supply issues for the departments. This could be an influencer of the increase in sickness absence performance during the Winter period. During February bed occupancy was regularly over 98% where the national average for enabling patient flow is around 95%. Demand and acuity are still important influencers of not achieving performance we are an outlier for acuity at 7% higher than the national average.

There has been an increase in patient death in stroke by 8% since December. Further analysis is being progressed to understand diagnostic performance as part of the quality team's focus on improvement.

Friends and Family test performance deteriorate by 6% from last month for inpatient response rates which is disappointing where the year to date figure has maintained above the target of 26%.

### **Looking forward:**

This section will be covered in risk and recommendation section at the end of the report.

**Peter Hollinshead**

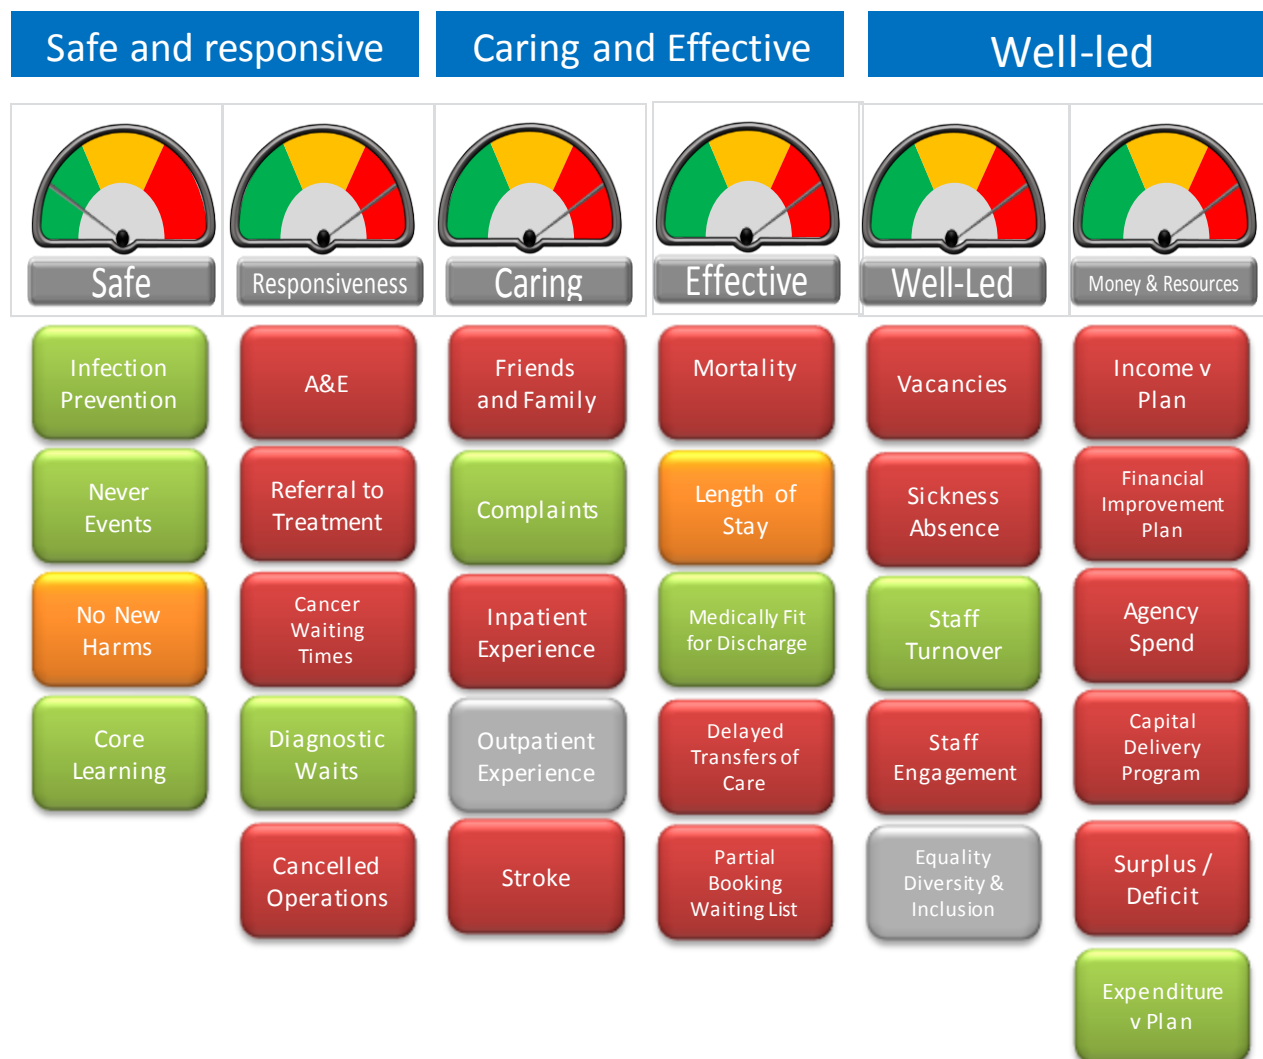

**Interim Director of Finance & Corporate Affairs**

**March 2017**

## 2. Integrated Performance Report

### Integrated Performance Report - Headlines

The dashboard shows the Trust's current performance against the chosen standards and indicators as a measure of overall Trust performance. The box to the right highlights key changes to performance during the period with priority actions. Further detail follows this summary at Business Unit and Speciality level. Action plans should focus on resolving performance issues or delivering improved performance where required.

#### Most deteriorated:

Domain: Caring  
Friends & Family Test response rates for A&E is 10% less than January and 6% less for inpatients than in January

Patient death in Stroke has increased by 8% since December

Domain: Safe  
#NOF 24 performance is -21.7% compared to January

Domain: Responsiveness  
Cancer 62 day screening has deteriorated 29% since December

#### Most improved:

Domain: Responsiveness  
Cancer 31 day subsequent treatments surgery achieved 97.1% in January

Domain: Responsiveness  
Diagnostics has seen a 0.5% improvement since January

#### Actions:

See Exception Reports for all amber and red rated Key Performance Indicators.

ULHT HSMR Rolling Year (36 Months)

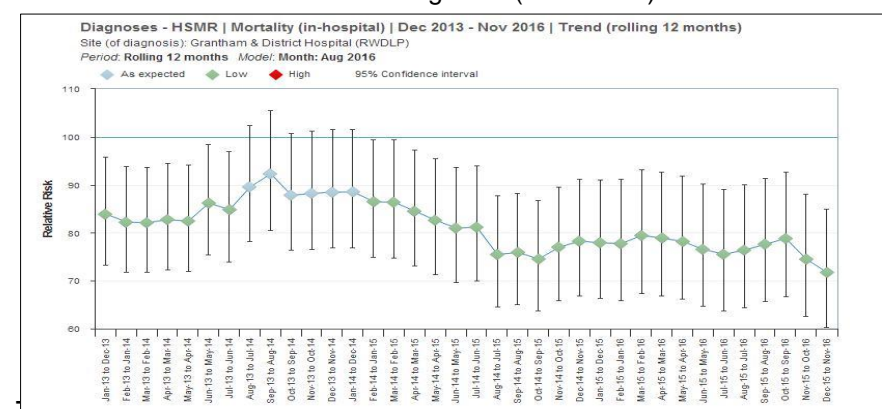

Lincoln HSMR Rolling Year (36 Months)

Pilgrim HSMR Rolling Year (36 Months)

Grantham HSMR Rolling Year (36 Months)

## Alerts

The Trust is not organisationally alerting on any diagnosis groups year to date. Ongoing work with Dr Foster; Derek Smith will be meeting with the Respiratory and Stroke to go through the data as these are our top observed diagnosis.

### Lincoln County Hospital

No alerting diagnosis groups.

### Pilgrim hospital

No alerting diagnosis groups.

### Grantham Hospital

No alerting diagnosis groups.

All diagnosis are closely monitored where an alert is consecutive for more than 3 months an in-depth analysis of data will be undertaken.

## HSMR Top Observed Diagnosis Groups- April 2016 to November 2016

Rank	Diagnosis group	Spells	Actual deaths	Actual % of all deaths	Expected deaths	Excess Deaths	Crude (%)	HSMR
1	Pneumonia	1524	272	20%	281.02	-9.02	17.89	96.79
2	Acute cerebrovascular disease	792	109	8%	114.00	-5.00	13.87	95.61
3	Septicaemia (except in labour)	524	103	8%	99.08	3.92	19.69	103.96
4	Acute and unspecified renal failure	530	66	5%	66.39	-0.39	12.55	99.42
5	Urinary tract infections	1565	57	4%	62.16	-5.16	3.64	91.70
6	Congestive heart failure, non-hypertensive	601	50	4%	64.89	-14.89	8.32	77.06
7	Secondary malignancies	1306	47	4%	38.18	8.82	3.61	123.09
8	Acute myocardial infarction	609	46	3%	41.32	4.68	7.58	111.33
9	Aspiration pneumonitis, food/vomitus	113	42	3%	32.70	9.30	37.17	128.45
10	Chronic obstructive pulmonary disease and bronchiectasis	931	42	3%	36.81	5.19	4.52	114.10

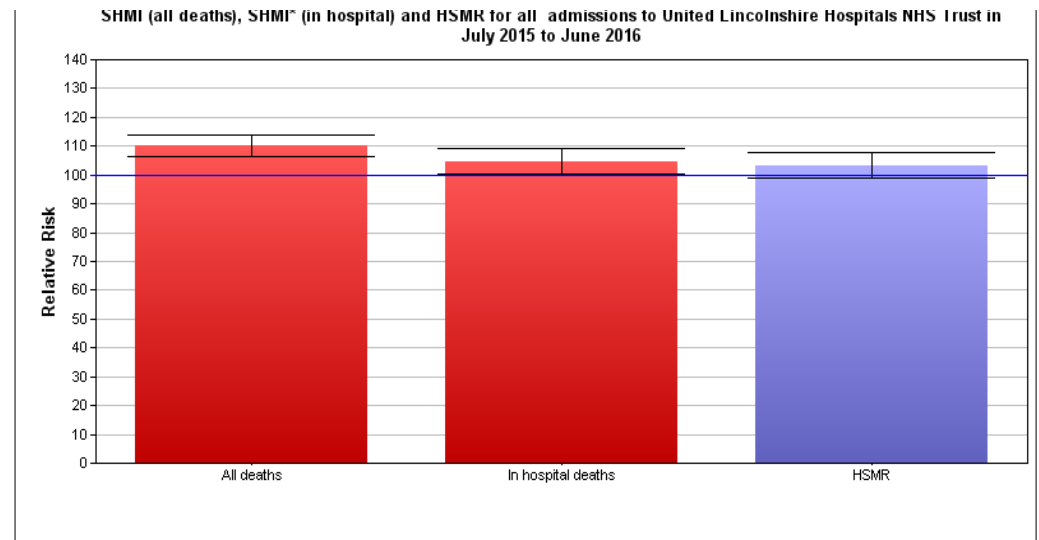

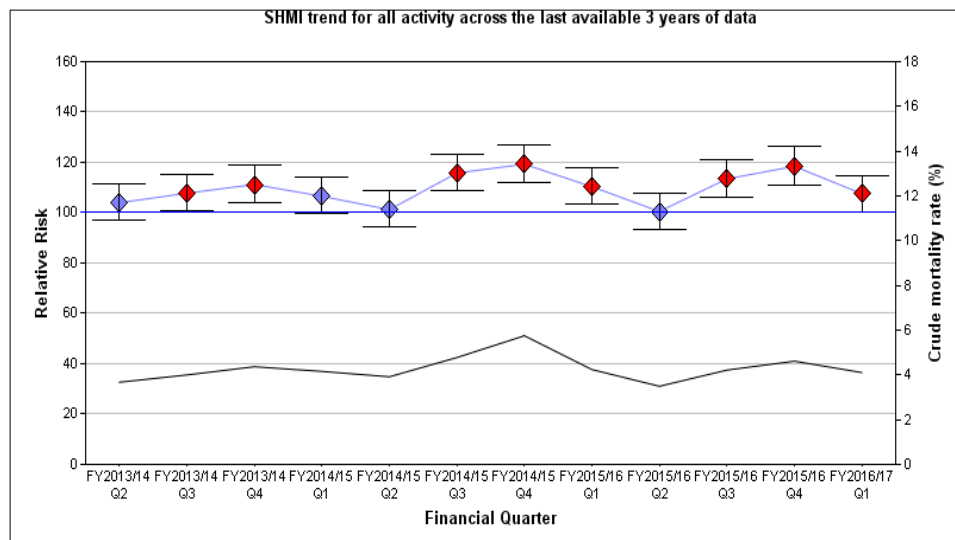

The above diagnosis groups show the top 60% of all deaths within the Trust

## HSMR – Peer analysis

## SHMI

The Trust is undertaking numerous strategies to understand why the SHMI data is not aligning to the HSMR data

- ❖ A meeting was held on the 22nd February, it was agreed that audits of a selection of patients who passed away over 80 years of age within 30 days and 48 hours of discharge will be reviewed every 6 weeks at Lincoln and also a 6 weekly meeting at Pilgrim with representation of ULHT, CCG and GP staff. The purpose of these reviews is to gather intelligence on the patients pathway to confirm if the patients were appropriately admitted/discharged, if there are learnings from within the hospital/community and look at the whole transition pathway for the patient. These meetings will consist of reviewing ULHT and CCG notes.
- ❖ ULHT are also reviewing the comorbidities for patients with a 0 charlson score over the age of 75.
- ❖ Governance in correlation with Information Support, Dr Foster and Coding are reviewing deaths that have occurred to ensure all comorbidities from prior admissions have been pulled through to the final admission and coded appropriately.

## Mortality Reviews

Reviews January 2016 – January 2017

**Current February Performance**

6 new Pressure ulcers

7 harmful falls (5 before admission)

1 new CA-UTI

4 new VTE's

The new CA-UTI patient was transferred with their notes before validation of the harm could take place. 2 Falls before admission have been included in the return in error and adjustments will be made to reflect accurate data.

**Action Plan**

Lincolnshire East CCG have been served with formal notice that from March 2017 ULHT will no longer include Falls Before Admission in their data return bringing methodology in line with Sherwood Forest, Nottingham University and Peterborough Hospitals.

Reports are distributed detailing where all harms have occurred.

Nurse specialists review all CA-UTI/Pressure Ulcers and VTE.

A work plan has been established for CA-UTI that includes more robust assurance around lessons learned from new CA-UTI. Additionally Old CA-UTI details will be shared with community colleagues from March 2017 to identify patterns of poor care in Nursing Homes and from within particular GP practices.

RCA'S are being completed when a patient has developed a hospital acquired thrombosis (HAT) and will be investigated in conjunction with ward leaders and Matrons.

### Performance Data Overview

There were 31 new HA Grade 2 Pressure Ulcers, 3 Grade 3 and 0 Grade 4. Performance does not reflect assertion of avoidability. The data demonstrates a reduction overall in pressure damage for February but not in line with target. For the period April – February

### Action Plan

Scrutiny panels are ongoing. Assurance for pressure damage will be reviewed as part of ongoing work to establish ward accreditation. Further discussions are planned to explore shared learning from pressure damage. The Pressure Ulcer Committee have asked for

2015/16 there were 335 HA Grade 2 Pressure Ulcers compared to 346 in 2016/17.

legal advice on suitability of iPads as medical photography tool as these are in situ on all wards doing eCobs.

Medication	Identification namebands in situ	98.50%	99.20%	97.90%	97.90%	98.80%	98.00%	99.50%	98.80%	99.80%	99.70%	98.50%	98.00%

### Performance Data Overview

53 (52%) of all the incidents recorded were associated with priority/high risk drugs. The top 4 drug groups are; antimicrobials (26%), anticoagulants (25%), insulins and antidiabetics (17%), potassium (9%). The most common incident by type are omitted dose and wrong/unclear dose, these account for 56 % of all medication incidents in February (58/102). Severity of incidents; Severe 0.98 % Moderate 5.9 %, Low Harm 8.8 % and No Harm 84.3 %.

### Action Plan

Data is reviewed at the Medicine Optimisation and Safety Committee and all incidents are reviewed on a monthly basis to identify trends. All Heads of Nursing receive the errors by ward area and disseminate to their matrons who in turn disseminate to their ward leaders. These all must be looked into regardless of the severity rating. Feedback reports from the Heads of Nursing are required to provide assurance that investigations and discuss have taken place.

## SAFE AMBITION 6 Reduction of Harm Associated with Infection

### Performance Data Overview

There have been 5 cases of hospital acquired C.Diff (trajectory 5) for the month of February. For the year 2016/17 hospital C.Diff is therefore still within trajectory. There were no hospital attributable cases of MRSA reported in February however, cases previously reported in January take ULHT over trajectory for 2016/17.

Hand Hygiene performance is 98 % for February 2017.

### Action Plan

Monthly hand hygiene drop in sessions undertaken trust wide. Hand hygiene information published on intranet and circulated through Ward Health Check. Messages communicated via twitter. Compliant assessment tool/review is undertaken for each patient with C.Diff. RCA is undertaken for each hospital acquired cases and an action plan put into place which is overseen by the Infection Prevention Committee (IPC) .

## Performance Data Overview

There was 1 new CA-UTI in February 2017, however, it was not possible to validate this infection as the patient was transferred from the hospital post collection and transported with their medical notes. The trust position for new CA-UTI will require review post receipt of February GEM Arden report including revisions of inaccurate submission for January 2017. Until these revisions take effect a sound judgement cannot be made around national comparison however, crude data indicates significant reduction on 2015/16 figures.

## Action Plan

Nurse specialists review all CA-UTI/Pressure Ulcers and VTE. A work plan has been established for CA-UTI that includes more robust assurance around lessons learned from new CA-UTI. Old CA-UTI details will be shared with community colleagues to identify patterns of poor care pre admission. Ongoing review of internal webpages. Exploration of electronic training bundle supplied by manufacturer and mapped to appropriate clinicians ESR accounts. Ongoing training of FY1 & FY2.

# SAFE AMBITION 7 Reduction of Harm Associated with Deterioration Sepsis

## Performance Data Overview

Site	Bundle Commenced –Feb 17	IVAB within 1 hour – Feb 17
Grantham	84.75%	70.37%
Lincoln	97.19%	83.72%
Pilgrim	82.76%	62.50%

There is week on week variability in site performance. Since January 2017 there has been notable improvement at Lincoln in respect of screening (January 88.37%) and deterioration at Grantham (January 94.74 %). Clinical engagement is variable across sites and Grantham and Boston have been asked to submit remedial action plans to the Sepsis Task & Finish Group

## Action Plan

E-Bundle launched on two wards at Lincoln and milestone plan to introduce additional areas to be collated by Sepsis Nurses. Compliance with e-learning remains at 71% however additional completed numbers are pending from postgraduate centre which will improve overall figures. Sepsis Focus day held at Lincoln with various engagement strategies. Launch of Sepsis boxes pending. Sepsis literature to comply with NICE requirements pending purchase order but clinical and patient approval. Sepsis PODCAST. Sepsis performance data added to the front page of the intranet with dedicated pages for Site breakdown

## 4. Finance

Date of report:	07 March 2017
Lead Director:	Peter Hollinshead, Interim Director of Finance
Purpose of Report:	An update on the Trust's financial position as at the end of February 2017, and full year forecast
Strategic Objective	1) Efficient use of resources
	2) Ensure the Trust is in line with delivery of it's key financial duties

The Board of Directors are asked to note the above and the following main points:

- The likelihood that the Trust will deliver a deficit of £54.9m compared to the control total of £47.9m
- The significant operational pressures in January have continued in February resulting in continuing high levels of agency expenditure and reduced elective activity and income

## High Level Financial Summary – February 2017 ( Month 11)

Measure	Plan to date	Actual to date	Annual Plan	RAG
Income	411.9	400.7	450.7	
EBITDA (£'m)	-28.2	-35	-29.6	
Net surplus (£'m)	-44.9	-49.9	-47.9	
Efficiency	16.9	15.6	19	
Cash (£'m)	1.1	2.2	1	
Revenue Support Grant (£'m)	-102.8	-103	-103.4	
Capital Expenditure (£'m)	15.6	9.4	16.7	

### Summary

The Trust has an agreed control total deficit of £47.9m for 2016/17.

The Month 11 position is a deficit of £7.0m, leading to a year to date deficit position of £49.9m. The performance to date has been impacted as a result of a high monthly spend on agency (£2.8m) to deal with the winter pressures and a resultant loss in elective income in month as beds are used to cope with the demands of winter.

The revised Income and Expenditure forecast (£54.9m) is based on the January performance to date with a projected run rate that shows an improvement in March from the February position.

As a consequence, the Trust will not be eligible for the Q4 STF funding of £3.9m.

The Trust is forecasting it will deliver its Capital Resource Limit (CRL) and its External Funding (EFL).

### Performance

- Year to date deficit is £49.9m compared to plan of £44.9m
- Cash holdings at the end of February are £2.2m with RSG of £103.0m
- Year to date efficiency is £15.6m c.f. plan of £16.9m
- Capex is £9.4m c.f. plan of £15.6m

### Forecast

The Trust is forecasting a deficit of £54.9m. This is a result of reduced elective income coupled with an increase in agency expenditure and reduced STF funding.

		Forecast	17.6	16.7	-0.9		16.7	16.7	16.7	16.7	16.7
Workforce	Substantive, bank and overtime (WTE)	YTD	266.4	261.8	-4.6		237.9	214.2	190.3	166.3	142.2
	Agency & Locum Staff (WTE)	YTD	20.1	26.1	6		23.3	20.5	18.2	15.8	13.7
	Total	YTD	286.5	287.9	1.4		261.2	234.7	208.5	182.1	155.9

The Trust has a control deficit as follows:-

£m  
Trading deficit 64.0  
Less STF funding 16.1  
Planned deficit 47.9

The continued winter pressures resulting in increased agency to staff escalation areas and the reduction in elective activity and income has resulted in a revised forecast trading position of £66.1m deficit, which results in the loss of STF funding for Q4.

The main risks to the forecast:-

- CCG activity challenges
- Continued winter pressures
- Delivery of CQUIN
- Delivery of the efficiency programme
- STF appeals

- Cash position slightly better than plan and still in line with the requirement of minimum £1m balance.
- Property value less than plan due to year end reduction in actuarial valuation, compensating reduction in revaluation reserve and retained earnings.
- The working capital support loan has been extending during the year which offsets the requirement for the Revenue Support Loan

## Financial Efficiency Programme – as at December 2016

- The FIP plan totals £19m for 2016/17
- Month 1 year to date delivery of £15.6m, of which £5.5m is non recurrent
- £6m estimated carry forward to 2017/18

- Cash position slightly better than plan, due to STF drawn down based on achieving Q4 finance element.
- The Trust has drawn up to the maximum £52.0m RWCF limit.
- Cash is being managed to achieve a year end cash balance in line with plan.

## Financial Performance – Working Capital

Non NHS debt over 90 days totals £0.2m, excluding those on payment plans.

NHS debt over 90 days totals £2.1m. This is split as follows:

	Over 90 Day Total
CCGs - Lincolnshire	884
CCGs - Other	362
Trusts - Lincolnshire	289
Trusts - Other	320
Other NHS	235
<b>Total</b>	<b>2,090</b>

2016/ 17 Year to date	NHS		Non-NHS	
	By volume Number	By Value £000s	By volume Number	By Value £000s
Total bills paid in the year	2,236	37,402	116,450	183,815
Total bills paid within target	1,630	28,993	96,725	151,162
<b>% of bills paid within target YTD</b>	<b>72.90%</b>	<b>77.52%</b>	<b>83.06%</b>	<b>82.24%</b>
<b>% of bills paid within February 2017</b>	<b>81.34%</b>	<b>76.82%</b>	<b>81.55%</b>	<b>80.12%</b>

## Capital Expenditure – as at February 2017

<b>Programme</b>	<b>FIMS</b>	<b>Plan to date</b>	<b>Spend</b>	<b>forecast</b>
	<b>£000's</b>	<b>£000's</b>	<b>£000's</b>	
Facilities	6,126	5,907	2,005	5,027
Additional £12m	0	0	1	0
Medical Devices Group (Risk)	5,062	4,078	2,363	3,641
IM&T (Risk)	3,596	3,516	2,348	2,732
Service Development & Modernisation	2,998	2,998	2,730	3,863

Prior Year Schemes			7	0
Unallocated/(over allocated)				
	19,550	18,083	9,454	15,263

- The forecast has been revised down by £3.2m to mitigate the impacts of the reductions to the funding sources mainly the delay in the sale of Welland Hospital.
- The in month spend was £0.5m. The spend to date of £9.5m leaves £5.8m to be spend by the end of the year. All of this is committed, with delivery of the estates requirement ( including the Neonates project) comprising the largest element. The medical equipment is all ordered for delivery by the end of March, the largest item being £0.4m for anesthetic machines.
- The forecast remains to deliver the CRL

	<b>-53,385</b>	<b>-54,991</b>	<b>-56,627</b>

- Forecast is currently projecting a most likely case of £54.9m.
- The revised Income and Expenditure forecast (£54.9m) is based on performance to date with a projected run rate including the continuation of winter pressures (£3.7m).
- Key risks are as follows:
  - a) CCG activity challenges
  - b) Continued winter pressures
  - c) Delivery of CQUIN likely to be less than plan
  - d) Delivery of the efficiency programme
  - e) STF appeals

#### 4. "Priority deliverables" – RTT Incompletes

<b>KPI:</b>	<b>Referral to Treatment</b>	<b>Owner:</b>	Chief Operating Officer
<b>Domain:</b>	<b>Responsive</b>	<b>Responsible Officer:</b>	Deputy Director of Operational Performance
<b>Date:</b>	<b>28<sup>th</sup> March 2017</b>	<b>Reporting Period:</b>	February 2017

<b>Exception Details</b> (provide an overview explanation / cause of the variance to performance and the consequences)	<p>In February performance was 88.27%.</p> <p>There are 3 significant factors which had an impact on performance across a range of specialities in the early months of 2016/17, and led to growth in the RTT backlog:</p> <ul style="list-style-type: none"> <li>• Junior Doctor Industrial Action – During the two periods of industrial action in April alone there were 1335 outpatient appointments cancelled as a direct consequence of the Trust needing to maintain patient safety during this action. In addition there was a significant reduction in surgical activity during these periods.</li> <li>• Grantham Fire – As a result of the fire which occurred at Grantham in April there were c.300 outpatient cancellations and 25 elective cancellations.</li> <li>• Partial Booking Waiting List – The number of patients overdue over 6 weeks past their target date has reduced by c.1800 patients between the end of June and the end of September. This reduction in the size of the partial booking waiting list will have reduced the capacity available to treat patients on incomplete pathways.</li> </ul> <p>The above factors led to a reduction in capacity within the Trust, and by August 2017 the backlog of patients over 18 weeks had increased to c.3000. This backlog position has remained relatively stable since that time.</p> <p>The increase in urgent care pressures during winter have a knock on impact onto RTT performance. In December and January, as part of the winter plan and to assist with the achievement of 85% bed occupancy by Christmas Eve and maintenance of urgent care flow, the Trust planned to complete a total of 130 less elective cases than standard (plus the impact of bank hols). In addition to this planned reduction, the Trust cancelled over 300 operations during December and January as a result of capacity issues such as lack of HDU and general beds.</p> <p>In February the winter plan scheduled for a return to standard elective operating capacity. However, the Trust cancelled over 200 operations during February as a result of capacity issues such as lack of HDU and general beds.</p> <p>The impact of urgent care pressures, and the requirement for Business Unit management to be involved in assisting with operational management of the sites during times of increased pressure have resulted in reduced Business Unit capacity to</p>
---	---

	<p>progress actions related to RTT recovery across a number of specialities.</p> <p>The Trust has an agreed trajectory which takes the performance to 92% by June. There is particular risk against speciality level trajectories within ENT, Orthopaedics and Cardiology, which due to their waiting list volumes create risk to the achievement of the overall Trust position in June.</p> <p>As at month 10 Neurology is 25% above the contracted activity plan, Dermatology is 19%, Endocrine is 19%, Gastro is 15% and Pain is 12%. All of these areas have RTT incompletes performance below 90%.</p>

## Referrals

## 18 Week RTT Incompletes

Source: Unify2 data collection

The above graph shows the latest available national performance for 18week RTT Incomplete performance. The peer group that has been selected to benchmark ULHT against consists of Trust's which have a similar rural structure and patient demographics.

### What action is being taken to recover performance?

The following 11 specialities have each produced recovery action plans which set out short term actions to improve speciality level performance – General Surgery, Orthopaedics, ENT, Gastro, Respiratory, Dermatology, Cardiology, Neurology, Endocrine, Rheumatology, Vascular.

Key actions contained within these plans include increasing internal capacity through additional outpatient and theatre sessions from our existing workforce and utilisation of additional locum capacity. Plans were in place in February to deliver additional activity (primarily in outpatients) resulting in c.400 clock stops and c.300 in March, however some of this additional activity will be offset by the high volume of elective cancellations.

	<p>The Clinical Directorates have plans to deliver over 300 additional clock stops above standard activity in April.</p> <p>The Trust has outsourced 71 patients between Orthopaedics and General Surgery this year. . Levels of outsourcing have been less than expected as access to outsourcing capacity, particularly within the East of the county, has been limited. The position regarding outsourcing during 2017/18 is yet to be confirmed.</p> <p>The different sites are working together in order to equalise waits across the Trust within speciality areas, and to ensure that capacity is fully utilised.</p> <p>Where activity levels are significantly above the contract level the CCGs are being asked to initiate actions to support the Trust by controlling referral rates into these specialities.</p> <p>An internal theatre productivity and scheduling improvement programme is in place and is anticipated to deliver an additional c.170 elective/day cases during Q4 above standard activity levels.</p> <p>In December the Business Units completed a clinical validation process relating to open referrals which have been waiting over 16 weeks from referral in order to ensure that they are appropriate for Consultant-led care. In January the Trust wrote to all patients awaiting a new appointment who were referred over 14 weeks ago, in order to ask them to confirm whether they still required an appointment. This process has now been completed.</p>

#### 4. "Priority deliverables" – Diagnostic 6wk Standard

<b>KPI:</b>	<b>Diagnostic Waits</b>	<b>Owner:</b>	Chief Operating Officer
<b>Domain:</b>	<b>Responsive</b>	<b>Responsible Officer:</b>	Deputy Director of Operational Performance
<b>Date:</b>	<b>28th March 2017</b>	<b>Reporting Period:</b>	February 2017

**Exception Details** (provide an overview explanation / cause of the variance to performance and the consequences)

In February the Trust achieved the 6 week diagnostic standard for the third month in a row. The performance level was 0.38%. The national average in January was 1.7%.

The number of 6-week breaches reduced from 102 patients in November down to 18 patients in February. At modality level performance of <1% was achieved in all modalities except for Urodynamics (with this area only reporting 1 breach).

The level of breaches within Echocardiography has been the most significant cause of the Trust's overall failure of this standard in the second half of 2016. The service has put on additional capacity in recent months particularly within stress Echo and TOEs, and as a result the backlog of breaches has reduced significantly. In November Echo reported 86 breaches, but this has reduced to 64 in December, 30 in January and 4 in February.

**Forward Trajectory**

**Diagnostics +6 weeks**

#### 4. "Priority deliverables" – Cancer 62 Day Standard

<b>KPI:</b>	<b>Cancer Waiting Times (62 Day)</b>	<b>Owner:</b>	Chief Operating Officer
<b>Domain:</b>	<b>Responsive</b>	<b>Responsible Officer:</b>	Deputy Director of Operational Performance
<b>Date:</b>	<b>28<sup>th</sup> March 2017</b>	<b>Reporting Period:</b>	January 2017

<b>Exception Details</b> (provide an overview explanation / cause of the variance to performance and the consequences)	<p>The Trust achieved a performance of 74.4% against the 62 day classic standard in January, an improvement of 2.5% compared with December. At the same time the national average fell 3.4% from being 82.9% in December to 79.5% in January.</p> <p>The Trust achieved 3 out of the 9 cancer standards in January.</p> <p>Demand is continuing at unprecedented levels (highest recorded February 2ww referral rate, 5.5% higher than last year) and the increased number of referrals coming into the Trust, and hence demand on all diagnostics is delaying diagnosis and putting additional pressures to treat the patients within a smaller window before they breach. Though significant effort has been made in all areas on 62 Day performance improvement work, a lot of this effort has been absorbed by the higher levels of patients being referred in on a suspect cancer pathway.</p> <p>The 62 Day Classic standard continues to remain the most challenged standard and work continues to improve the quality of the patient journey on the understanding that improvements in this will work directly towards achievement of this standard. The RCAs for January 62 day breaches found a number of key themes in terms. Access to diagnostics within ULHT, particularly Radiology and Endoscopy, was slower than required for a significant proportion of patients on 62 day pathways. Since January Radiology turnaround times have improved for patients on suspected cancer pathways; however the impact of this on the 62 day performance is unlikely to be seen until March. In addition, delayed access to specialist tests (such as EBUS and EUS) and treatment at tertiary centres introduces further waiting periods into the 62 day pathways for our patients, deteriorating ULHT's performance. Small delays in access to the Oncology service and patient choice delays, particularly over the Christmas period, also contributed to the Trust's performance position.</p> <p>The impact of urgent care pressures on bed capacity and particularly HDU capacity is adversely affecting cancer performance, with increasing numbers of cancelled operations for cancer patients.</p> <p>The Trust's performance against the 14 day suspect cancer target and the 14 day breast symptomatic target were both adversely effected in January by a spike in referrals into the breast service, with referral rates in January of over 135 patients per week compared to a baseline service capacity of 100 slots per week.</p>
--	--

## Forward Trajectory

## Variance Analysis (SPC Chart)

## 62 Day Cancer Performance

Source: Cancer Waiting Times Database

The above graph shows the latest available national performance for 62 Day Cancer performance. The peer group that has been selected to benchmark ULHT against consists of Trust's which have a similar rural structure and patient demographics. From this graph it can be seen that ULHT Is an outlier in the peer group.

### What action is being taken to recover performance?

The Trust holds a fortnightly Cancer Recovery and Delivery meeting, chaired by a Deputy Director, in order to provide an oversight of the change programme set out in the Trust's Cancer Action Plan, holding Business Units to account for performance and delivery against the action plan.

The 7 Day Horizon (potentially cuts a week out of pathway by making the First Appointment within 7 days of referral as opposed to 14 days) has now been successfully deployed in all areas that are appropriate. The areas that due to operational reasons will not be able to cross over (Brain, Breast, Sarcoma and Dermatology); will continue under the IST Capacity & Demand 85<sup>th</sup> percentile system.

	<p>There is now a weekly Radiotherapy PTL meeting held within the department so that they have visibility of all patients waiting for RT treatment and their target dates. The continued Subsequent RT performance reflects this work.</p> <p>The Upper GI Straight to Test pilot has proven to be successful and county-wide roll-out of the service will be from April 2017. Likewise plans are being developed to roll out the lower GI straight to test pathway to all sites by May 2017.</p> <p>The Somerset Cancer Register implementation continues at a fast pace. There are now 156 registered users (compared to 40 on Infoflex), including MDT Co-ordinators, Clinicians, Specialty Doctors, Business Unit teams, Bowel Screening Practitioners, Cancer Nurse Specialists, Radiology Booking Teams, Pathologists, Dietitians and Macmillan Cancer Information staff. A pilot of using it live in the MDT, sharing the information across two hospital sites, and the clinical outcome being recorded, printed and signed off within the meeting was successful and roll-out to the other MDTs continues.</p> <p>Radiology are currently piloting a new booking process, where appropriate patients are asked to go directly to Radiology reception, following their outpatient clinic appointment, in order to book their Radiology diagnostic appointment before they leave the Hospital. It is anticipated that this will reduce the time from referral to diagnostic test being completed.</p> <p>The Trust has utilized funding from the national diagnostic capacity fund in order to reduce CT waiting times, and the Radiology Dept. are currently exploring how additional capacity can be maintained after the end of March when this funding ceases.</p> <p>An Endoscopy stakeholder group met for the first time in March in order to plan how additional Endoscopy capacity could be provided in order to reduce waiting times within this area.</p> <p>Level 1 Beds are scheduled to open on the Lincoln site in April, with the expectation that this will reduce the number of cancelled operations linked to HDU capacity.</p>
<b>What is the recovery date?</b>	
<b>Who is responsible for the action?</b> (Provide the role and name of the lead)	

#### 4. "Priority deliverables" – A&E 4hr Standard

<b>KPI:</b>	<b>4 Hour Wait (A&amp;E)</b>	<b>Owner:</b>	Chief Operating Officer
<b>Domain:</b>	<b>Responsive</b>	<b>Responsible Officer:</b>	Deputy Director of Operations; Emergency Care Interim Head of Nursing; Grantham
<b>Date:</b>	<b>28<sup>th</sup> March 2017</b>	<b>Reporting Period:</b>	February 2017

<b>Exception Details</b> (provide an overview explanation / cause of the variance to performance and the consequences)	<p><b><u>ULHT:</u></b></p> <p><b><u>Commentary:</u></b>          Overall Trust performance is 74.87%. This is 14.13% lower than the planned recovery trajectory of 89%, and 5.33% less compared to February 2016.</p> <p>The February quality measures for:</p> <ul style="list-style-type: none"> <li>- triage are below the 15 minute standard at 8 minutes for the median (55 mins based on the 95<sup>th</sup> centile)</li> <li>- time to first 1<sup>st</sup> treatment at 76 mins for the median against a target of 60 mins (213mins at 95<sup>th</sup> centile).</li> </ul> <p>Attendances at ULHT level have reduced against plan since August last year, which is linked to the overnight closure of Grantham. During February attendances were 1055 less than during January with a corresponding reduction in total emergency admissions (593). The ULHT admission to attendance ratio is down by 1.11% compared to last February, with Lincoln (-1.55%), Pilgrim (-0.01%) and Grantham (+1.31%). Despite the reduction we saw a considerable increase in medical outliers which suggests that surgical specialities admissions reduced rather than medicine. Delays in Ambulance handover however remain at unacceptable levels.</p> <p>The ULHT overall bed occupancy for February was between 93.31 and 97.56% and DTOC remained c.5-6% of occupied acute beds. It must be noted that bed occupancy during February was the highest for the year to date. A snapshot view of "stranded" (over 7 day LOS) in February demonstrated that 50% of all patients in Grantham &amp; Pilgrim were stranded and 40% at Lincoln.</p> <p>Key issues affecting performance for February were:</p> <ul style="list-style-type: none"> <li>• Workforce numbers remains insufficient to meet historical demand and planned contractual increase</li> <li>• Continued reliance on agency locums</li> <li>• Estate is not fit for purpose to manage ambulance handovers, minors and majors volumes</li> <li>• Bed occupancy levels are high, leading to inability to manage surges in demand</li> <li>• Internal and external delays for patients requiring discharge</li> </ul>
--	---

## ULHT- Total number of medical outliers at Thursday MN

Each site is detailed below, including a commentary of the reasons for poor performance.

### Grantham:

No exception report included as Grantham has exceeded the performance standard for the last two quarters and is on track to deliver the year end position, however the graphs below demonstrate the reduction in attendances (and Ambulance conveyances) since the overnight closure in August 2016.

#### No of Attendances vs Plan

#### EMAS conveyances - Grantham Hospital

**Pilgrim:**

February's overall performance was 70.49%. This 14.51% below the planned recovery trajectory and 0.33% less compared to February 2016.

Total attendances are at the planned level for February. We have seen a reduction in conveyances by c. 8 per day in Feb '17 when compared to February 2016. Ambulance handover performance has improved in February compared to last month, but remains variable. The total emergency admissions are down by 241 compared to January, however bed occupancy rates remained in excess of 98% during February. DToC levels remain high (average at 5.6% for February).

Arrival to triage median is at 10 minutes (62 mins at 95<sup>th</sup> centile) against the 15 minute standard and first treatment median time is 65 mins against 60 mins (218 mins at 95<sup>th</sup> centile).

In-month key issues affecting performance in February were:

- Vacancies in ED Medical rota's with reliance on agency locums.
- Vacancies in Nursing rota's with a variance in agency or bank fill rates.
- Poor hospital flow – admissions exceeded discharges. The AEC area was frequently used as escalation bed capacity resulting in inefficient processing of ambulatory patients. The Ground floor theatre area was also used as escalation capacity when pressure became extreme. Elective work was cancelled to facilitate medical patients (up to 50) in surgical beds.
- The MMFD numbers have increased with external delays awaiting packages of care & community beds.

### Lincoln:

February's overall performance was 72.14%. This is 18.66% below the planned recovery trajectory and 7.03% less compared to February 2016.

Total attendances are slightly below plan during February. Ambulance handover performance has steadily deteriorated and had 459 crews delayed over 1 hour. The total emergency admissions are down by 281 compared to January, however bed occupancy rates peaked at 99.45% during February. They have subsequently reduced following the launch of Red 2 Green. DTOC levels remain high (average at 5% for February).

In-month key issues affecting performance in February were:

- Vacancies in ED medical rota's with reliance on agency locums. Increasingly variable shift cover in ED with many new locums doing single shifts.
- Vulnerability in medical staffing due to medical locum sickness or last minute cancellation.
- Acuity on site during February remained extremely high with demand outstripping capacity for resus capacity, ICU beds and NIV beds.
- Poor hospital flow – admissions exceeded discharges up until the 20<sup>th</sup> February with the launch of Red 2 Green. Additional escalation beds were opened on site to support flow. Elective work was cancelled to facilitate the use of Surgical Admissions Lounge as escalation and medical patients (up to 60) were placed in surgical beds
- MFFD and reported external delays had remained static until the launch of Red 2 Green, whereby numbers increased.
- Despite increased flow, reduced outliers, and reduced usage of escalation areas the ED performance did not improve (with one exception, Friday 24<sup>th</sup>, 93.64%). Reasons for this were attributed to delays in 1<sup>st</sup> assessment by the ED medical staff, which is linked to point one above.

## A&E Attendances & Emergency Admissions

Source: Unify2 data collection

The above graph shows the latest available national performance for A&E attendances and emergency admissions. The peer group that has been selected to benchmark ULHT against consists of Trust's which have a similar rural structure and patient demographics.

### What action is being taken to recover performance?

#### Pilgrim:

- Additional medical staffing is still being funded as a cost pressure (x1 Day Middle Grade / x2 Night Middle Grade)
- A&E Specific SDM Support extended to end of April
- Continual recruitment/interviews for Middle grade Dr's
- Review of Rota's to try and ensure the best possible skills mix is present OOH/Weekends
- Breach Performance analysis being performed to identify any particular trends or patterns, as well as breach League table for the clinicians
- Embedding of SOPs for the nursing staff working in the different areas to improve communication with the nurse in charge
- The Paediatric business unit are developing a new structure which will work similar to the STRAP protocol that is used in other specialities to improve flow during times of high pressure
- Established a new drug cupboard outside RAIT that has reduced RAIT times by approx 4-5 mins in an internal audit
- Meetings ongoing with orthopaedic speciality to address the delays with reviews
- Revised ambulance handover process to Dr in RAIT that has reduced turnaround times
- Ongoing process to embed Pride and Joy with adjunct of Red2Green launching on 24<sup>th</sup> April
-

	<p><b><u>Lincoln:</u></b></p> <ul style="list-style-type: none"> <li>• The re-launch of Red2Green on 20<sup>th</sup> February improved hospital flow, reduced outliers, reduced the usage of escalation areas and reduced cancellations of electives. This process is now being embedded with twice daily meetings.</li> <li>• With the continued rollout of SAFER we have seen discharge lounge use improve month on month since December (from 330 patients per month to 434 patients in February). The Urgent Care Delivery Manager is undertaking a focussed piece of work to embed SOP's for new ways of working in the lounge and with the wards.</li> <li>• Evaluation of the impact of the Ambulatory Care Service shows that prior to their relocation from the ED footprint they saw an average of 6.5 patients daily (7 day week), totalling 195 patients a month. In February this rose to 12 patients seen daily (5 day week) with 245 patients seen in month. Based on the first week of March the activity estimate for March looks like reaching 17 patients daily and circa 340 patients in the month. Work will continue to expand the types of patient that the Ambulatory Care Service can accommodate.</li> <li>• Recruitment continues to secure staff on a permanent basis for RAT to make this service more robust and less reliant on agency medical and nursing staff. Feedback from EMAS is positive.</li> <li>• There has been some success in medical recruitment and 1.0 wte further junior doctor resource has been recruited in month (start date awaited) and 1.0wte GP for ED has been recruited (start date awaited). There is also a potential candidate for Consultant interview.</li> <li>• The other additional medical staffing measures that have been in place during winter on site continue to be covered although coverage has been variable with locum fill rates. Substantive funding has been confirmed and the focus is now on recruitment to these posts on a permanent basis to reduce risk to safety and performance.</li> </ul>
<p><b>What is the recovery date?</b></p>	<p>N.B. Further focussed work is planned to commence in early March (See separate paper: Urgent care – Short term actions to improve performance)</p> <p><b><u>Grantham:</u></b> Plan to achieve over the trajectory for quarter four to realise year-end trajectory.</p> <p><b><u>Lincoln and Pilgrim:</u></b> Ongoing historical demand pressures and workforce challenges performance is expected to remain challenged in the near future. Q1 ambition is to achieve in excess of 82%. The National expectation is to deliver in excess of 90% in September 2017.</p>
<p><b>Who is responsible for the action?</b> (Provide the role and name of the lead)</p>	<p>Maxine Hughes Head of Operations and Clinical Services Grantham Site Paul Hogg, Senior Business Manager, Pilgrim Hospital Lisa Vickers, Senior Business Manager, Lincoln County Hospital</p>

## 4. Exception Report: Well-led

<b>KPI:</b>	<b>Sickness Absence</b>	<b>Owner:</b>	Director of Human Resources
<b>Domain:</b>	<b>Well-led</b>	<b>Responsible Officer:</b>	Assistant Director of Human Resources
<b>Date:</b>	<b>28<sup>th</sup> March 2017</b>	<b>Reporting Period:</b>	February 2017

**Exception Details** (provide an overview explanation / cause of the variance to performance and the consequences)

The Trust has a target of 4% for staff absence. The Trust annual rolling sickness rate of 4.73% as at January 2017 has increased by 0.22% in comparison to the January 2016 figure (4.51%).

Sickness Comparison:

Year	Year End Sickness Absence rate
2011/12	4.95%
2012/13	5.12%
2013/14	4.66%
2014/15	4.79%
2015/16	4.54%
2016/17	4.73% (12 months ending January 2017)

Monthly sickness rate for January 2017 is 5.50%. Sickness absence data is reported two months in 'arrears'.

Historically we've seen sickness go up during the summer period, followed by a decrease, the weighted increase since September is higher than previous years, which is cause for concern. This could be attributed to seasonal influences e.g. flu.

The annual cost of sickness (excluding any backfill costs) has increased by £500,065 (from £8,483,817 as at Jan '16 to £8,983,882) compared to 12 months ago.

During the 12 months ending January '17, Anxiety/Stress/Depression and other Psychological illness was the top reason for time lost due to sickness at 19.87% of all absence. These 'mirror' patterns across the NHS nationally, incl. MSK

Additional Clinical Services had the highest sickness rate during the 12 months at 7.19% (Unregistered Nurses 7.59%) followed by Estates & Ancillary at 6.46% and Nursing & Midwifery Registered at 4.90%.

The latest Benchmarking data as at October 2016 from NHS Digital (previously Health & Social Care Information Centre - HSCIC) indicates that ULHT has the ninth highest sickness rate (lowest at 2.90% and highest 5.54%) against an average of 4.34%. The benchmarking is done across x39 Large Acute Trusts.

Comparison data with other Lincolnshire Trusts:

LCHS – 4.78% (unplanned sickness)

LPFT – 4.60%

## Forward Trajectory

<b>Total</b>	<b>99</b>	<b>130</b>	<b>111</b>	<b>81</b>	<b>421</b>

**Note: 16/17 data is for the 11 months ending 28th Feb '17 only**

Historically data indicate/confirm that we have managed to retain more staff with less than 12 months' service/employment with ULHT over the past 12 months.

Comparative December data from the East Midlands 'Benchmarking Group' (x10 Trusts) indicate that ULHT has the second lowest turnover rate (lowest at 9.27% and highest 14.37%).

Nursing and Midwifery turnover rate has decreased in month to 8.14% (down from 8.50%). Medical and Dental Staff turnover rate has decreased in month to 14.09% (down from 15.02%).

Based on the latest (December 2016) benchmarking data available (x39 Trusts) from NHS Digital (previously Health and Social Care Information Centre) for other Large Acute (Non-Teaching) Hospitals:

- The current Trust turnover rate of 9.35% is below the average of 10.43%
- The current Trust Nursing & Midwifery (Registered) turnover rate of 8.14% is below the average of 11.12%,
- Other Additional Clinical Services (usually unregistered) 11.96% is below the average of 13.94%.
- AHP's 13.10% is above the average of 12.76%.

High level of turnover in Clinical Support Services, HR & OD and Nursing will impact on the function and the ability to provide the service/s the Trust need.

Although the overall turnover rate is below the 'average' (benchmark), the concerns remain that we continue to 'lose' staff in the areas/specialities we cannot afford to do so. We need going forward, to focus upon any hot-spot areas

Forward Trajectory	It is unlikely that the target of 8% will be achieved by March 2017. The turnover rate has remained below 10% over the past six months.

What action is being taken to recover performance?	<ul style="list-style-type: none"><li>• We will utilise the data from the revised exit interview process to explore in more detail the reasons why employees are leaving the Trust, in particular areas such as Clinical Support Services, HR &amp; OD and Nursing.</li><li>• Workforce Scorecard comparative data has been shared with the Directors/Clinical Directors, which shows compliance against key workforce indicators</li><li>• The STP 'models' a different workforce and the use of vacancies/turnover will be a factor to 'facilitate' the shift in the workforce across services/organisations and work streams.</li><li>• We will link closely with the Lincolnshire Retention Strategy to identify methods to improve staff retention.</li></ul>																																				
What is the recovery date?	We are unlikely to achieve the target by March. A new target will be set as part of the development of the People Strategy																																				
Who is responsible for the action? (Provide the role and name of the lead)	Clinical Directors and Heads of Department are responsible for leading and managing their service areas, including understanding why people leave; addressing areas of concern, and having plans to replace them. HR is responsible for identifying trends and/or areas of concern regarding why people are leaving and helping the Trust address any such issues. HR will work with the business to understand what we can do within the employee lifecycle to tackle the reasons why people leave.																																				

#### 4. Exception Report: Well-led

<b>KPI:</b>	<b>Medical Staff Engagement (Medical Appraisals)</b>	<b>Owner:</b>	Dr Kapadia - Medical Director
<b>Domain:</b>	<b>Well led</b>	<b>Responsible Officer:</b>	Sue Powley - Head of Medical Revalidation
<b>Date:</b>	17 <sup>th</sup> March 2017	<b>Reporting Period:</b>	February 2017

<p><b>Exception Details</b> (provide an overview explanation / cause of the variance to performance and the consequences)</p>	<p>Medical Staff appraisal compliance rate for month ending February 2017 is 86%. The year-end target is 95%. This figure includes Consultants, SAS Doctors including Locums. High turnover of doctors, in particular short term locums covering gaps in junior doctor rotas, continues to present a challenge as a low % of new starters have previously been appraised.</p> <p>The current appraisal rate of 86% is unchanged compared to the end of February 2016 position and the January 2017 figure.</p> <p>An increased number of doctors are failing to have an appraisal within their designated appraisal month despite efforts by the Revalidation Office. Meetings with Doctors who have not yet completed their appraisal are taking place in order to establish the support they need and to remind them of the contractual and professional requirement to participate in annual appraisal.</p> <p>35 (6%) of the 540 doctors currently employed by the Trust are scheduled to have their appraisals before end of March 2017 an improved position in comparison with end of January 2017 - 51 (9%).</p> <p>Outstanding appraisals are at various stages of completion including documentation complete awaiting appraisal meeting or awaiting final sign-off. Only 2 doctors do not have an agreed date for their appraisal meeting before the end of the Appraisal year (31-03-17). These doctors are now being managed in accordance with the Trust Medical Appraisal escalation process.</p> <p>There is improved communication with doctors who in the past have failed to respond to email requests and letters to make contact with the Revalidation Office. The use of mobile and telephone contact to establish the position with appraisal arrangements has been quite successful and medical secretaries have been really helpful.</p> <p>No doctors have submitted formal requests in February to postpone their appraisals.</p> <p>The appraisal rate for locum doctors employed to cover gaps in junior doctor rotas has dropped significantly to 31% compared to the 64% January position. This is due to the high turnover of staff in</p>
---	---

	<p>February 2017. A total of 16 doctors have not worked in the UK previously and have therefore not participated in the appraisal process.</p> <p>Although short term locum turnover is high (35% in Feb 2017), Doctors in this group are encouraged to engage in medical appraisal during their contract period which ranges from one month to 12 months.</p> <p>Delay in final sign off of appraisal documentation has again improved this month. The Revalidation Office will continue to closely monitor progress to ensure timely sign off meets the GMC requirements of 28 days following the appraisal meeting.</p> <p>The Revalidation Team have a plan in place for every doctor whose appraisal is due to take place before the end of March 2017.</p>

<b>What action is being taken to recover performance?</b>	<ul style="list-style-type: none"> <li>• There is a plan in place for each doctor whose appraisal is due before the end of March 2017.</li> <li>• Proposal to increase the admin support to the Revalidation Office 0.53 of Band 2 to ensure improved governance to Revalidation processes. Awaiting decision from Medical Director.</li> </ul>																												

	<ul style="list-style-type: none"> <li>• Close monitoring and prompt action by the Revalidation Office when appraisals are not undertaken as planned. The new Allocate e-appraisal system allows the Administrator to track progress with timely completion of appraisal documentation. This enables early intervention and support to both appraisee and appraiser.</li> <li>• Notification of '<i>Appraisal Due</i>' sent to Doctors 4 months prior to their appraisal month. Strict adherence to the escalation processes set out in the Medical Appraisal Policy, with particular focus on the allocation of appraiser to appraisee 6 weeks prior to the appraisal due date if the doctor has not confirmed appraisal details.</li> <li>• Closer monitoring of appraisal progress on the e-allocate appraisal system. Reminders sent to Appraisers to complete Appraisal Output documentation and <i>sign off</i> appraisal documentation within 28 days of the appraisal meeting.</li> <li>• Reminders sent to Appraisees to complete sign off the appraisal documentation within 28 days of the appraisal meeting in accordance with GMC guidance.</li> <li>• Ensuring doctors receive continuing support to use the new Allocate system.</li> </ul>
<b>What is the recovery date?</b>	31st March 2017
<b>Who is responsible for the action?</b> (Provide the role and name of the lead)	Head of Medical Revalidation, Sue Powley supported by the Revalidation Administrator.

## 4. Exception Report: Well Led

<b>KPI:</b>	<b>Staff Engagement (Staff Appraisals)</b>	<b>Owner:</b>	Director of HR
<b>Domain:</b>	<b>Safe</b>	<b>Responsible Officer:</b>	Elaine Stasiak, Workforce Intelligence (reports completed by Karen Taylor, Asst Director HR)
<b>Date:</b>	<b>28<sup>th</sup> March 2017</b>	<b>Reporting Period:</b>	February 2017

<p><b>Exception Details</b> (provide an overview explanation / cause of the variance to performance and the consequences)</p>	<p>The Trust has a target of 95% for Appraisals. Agenda for Change Staff Appraisal compliance rate for February is 65.93%.</p> <p><i>Appraisal Compliance rate (Year-on-Year) comparison:</i>  March 2014 – 47.13%  February 2016 – 65.44%  February 2015 – 74.02%</p> <p>The overall percentage for appraisals has reduced by 1.27% from the previous month and 4.47% since the end of November 2016.</p> <p>Although we've seen a significant increase in the appraisal rate since 2014, the data shows a consistent compliance rate at the same period each year and the compliance rate over the last 12 months has remained in the 64% - 70% range.</p> <p>Appraisal compliance rate is calculated based on a percentage of appraisals completed over a 12-months' rolling period. The 'target' of 95% is based on the expectation that every member of staff should have an appraisal and it should take place on or before the employment 'anniversary' date or within 12 months from previous appraisal. The other 5% is provision for absence, maternity leave etc.</p> <p>X1 Directorate has a compliance rate less than 50%  X8 Directorates have a compliance rate between 50% and 65%  The remaining x9 Directorates have a compliance rate between 65% and 80.00%</p> <p>Appraisal rates reduced at Lincoln (-1.54%), Louth (-5.34%), Grantham (-1.87%) and Pilgrim (-0.42%) compared to the previous month end.</p> <p>CQC have identified the need to achieve higher appraisal completion rates. We will work with leaders across the organisation to increase rates in the short-term, but explore also why completion rates are low and how we need to change our performance management arrangements or the underlying culture to enhance compliance (ensuring people want to (participate in appraisal)</p>
---	---

<b>Forward Trajectory</b>	We have consistently not achieved a compliance rate above 70% (highest to date) and we must therefore look for a concerted effort from leadership to achieve the target of 95% at year end.

## 5. Summary of “Priority deliverables” – Performance against STF Trajectories

The dashboard shows the Trust's current performance against the non-negotiables as set out in the Sustainability and Transformation Fund. Trajectories and performance are based on what has been agreed within the 2016/17 Contract with Lincolnshire Clinical Commissioning Groups and therefore not necessarily to deliver performance at the national constitutional standard (for example A&E).

Further information and remedial actions in relation to the four access standards are illustrated over the following pages. Further information with regards to the agency spends and financial run rate are captured within the Trust Board Finance Report.

## 6. Risks and Recommendations

### Risks

RTT – The Trust expected to meet the constitutional standard by May 2017 when it forecasted performance in the submitted Trust Two Year Integrated Operational Plan. From the exception report there is increased risk from last month of achieving this target.

There has been a review of the Cancer Recovery Action Plan with a focus on 62 Day Waiters. The plan has been shared with external partners and was received positively, however, there is still some concern that we are not articulating our intent to reach the standard in year even though achieving 81% from July 2017 is still the intention even though this target is below the national average.

Expenditure and deficit recovery - see Finance Section and separate report.

### Recommendations

RTT performance is at high risk of not achieving the proposed trajectory and although ongoing discussions with NHSI and CCGs are taking place each month the improvement date keeps shifting forward. Validation still remains a key focus to achieve the level of performance we are reaching which is unsustainable. Trust Board is advised to seek further assurance for the purpose patient experience, safety and achievement of STF trajectories to consider increased recovery action to achieve the standard.

Committee is advised to maintain a focussed interest in the challenge to deliver the Cancer Recovery Action Plan, on a quarterly basis as a minimum, to assure themselves of continuous improvement as a result of the actions being taken.

Committee is asked to feedback on the highlighted successes, challenges and risks and to follow up on the recommended two actions from this month's report.

The report this month has included a number of more detailed sections for Committee to consider. As a result the document has increased in size and content. Committee is asked to consider whether it would like to focus on a small number of areas of performance (priority performance areas) each month with more detailed analysis and benchmarking being provided to assure our position.

## 7. Equality Analysis Statement

The Trust is committed to carrying out effective equality analysis and to assure Trust Board of compliance with the Public Sector Equality Duty (Equality Act 2010). The Act requires specific provision is made to consider the impact of services and functions for people who identify with one or more of the nine protected characteristics. The Integrated Performance Report recommends decisions, action and change which may have an impact on services and functions. The actions and recommendations identified in Directorate Plans, Exception Reports in this document and any related Recovery Action Plans which support performance improvement should be subject to effective equality analysis as described in The Equality Act and our revised documentation.

In producing this report we have carried out an initial assessment and identified gaps in three areas where activity is identified that may have an impact on services and functions and therefore on people who identify with one or more of the nine protected characteristics. These are:

- Directorate Plans: Clinical and Corporate Directorate operational plans that identify actions to be taken to achieve the strategic objectives of the Trust, for example, service delivery and meeting constitutional standards (A&E, RTT, Cancer).
- Performance Recovery Plans (RAPs): Actions either recommended or already ongoing in addition to the above that are required to recover performance within a given period.
- Decisions/Actions/Change initiated by approval by Trust Board to progress the actions required to recover performance. Decisions/Actions/Change approved by Trust Board in order to ensure performance improvement within a given period.

Trust Board is advised that gaps in effective equality analysis currently exist in all three areas of the above activity. It is recommended that this analysis should be carried out by producers of the plans to ensure compliance and to provide assurance to Trust Board that we are effectively considering the impact of our actions.

## Appendix 1. Monitor Risk Rating

Area	Indicator	Threshold	Monitoring Period	Monitor Weighting score	Apr-16	May-16	Jun-16	Jul-16	Aug-16	Sep-16	Oct-16	Nov-16	Dec-16	Jan-17	Feb-17	Mar-17

Monitor Governance Risk Rating Calculation	
<1.0	Green
≥1.0	Amber/Green
<2.0	Amber/Red
≥2.0	Amber/Red
<4.0	Amber/Red
≥4.0	Red

GOVERNANCE RISK RATING	
Monitor assign a Governance Risk Rating to reflect quality of services at a Trust. Higher levels of governance risk may serve to trigger greater regulatory action.	
The Risk Rating is calculated from performance against service indicators.	
Each of these indicators is given a weighting and compliance with all indicators would achieve a Risk Rating of 0.	
For each non-compliant indicator the weighted score is applied and the total of these formulate the Risk Rating.	
The numerical score is RAG rated using the table to the left.	
Monitor may apply a red Governance Risk Rating where any indicator with a rating of 1.0 is breached for three successive quarters.	
For each of the non-compliant indicators a failure in one month is considered to be a quarterly failure.	

## Appendix 2. Glossary

<b>MRSA bacteraemia</b>	Methicillin-resistant Staphylococcus aureus
<b>MSSA</b>	Methicillin Sensitive Staphylococcus aureus
<b>ECOLI</b>	Escherichia coli
<b>UTIs</b>	Urinary tract infection
<b>VTE Risk Assessment</b>	Venous thromboembolism
<b>Overdue CAS alerts</b>	Central alerting system
<b>SQD %</b>	Safety and Quality dashboard
<b>eDD</b>	Electronic discharge document
<b>PPCI</b>	Primary percutaneous coronary intervention
<b>#NOF</b>	Fractured neck of femur
<b>A&amp;E</b>	Accident & Emergency
<b>RTT</b>	Referral to Treatment
<b>SHMI</b>	Summary Hospital level Mortality Indicator
<b>LoS</b>	Length of Stay

### Appendix 3. Overview of thresholds for Red, Amber, Green ratings

Below is an explanation of how the RAG rating for each measure, KPI and Trust Value is calculated.

	<b><u>Red</u></b>	<b><u>Amber</u></b>	<b><u>Green</u></b>
<b><u>Section 2 – KPIs</u></b>	The majority of measures in section 3 that make up the KPI fail the target by more than 10% tolerance	The majority of measures in section 3 that make up the KPI fail the target but within the 10% tolerance	All measures in section 3 that make up the KPI achieve the target
<b><u>Section 2 – Trust Values</u></b>	Any zero tolerance measures fail the target (e.g. never events) or any priority deliverables fail the target or the majority of KPIs that contribute to the Trust Value fail the target by more than 10% tolerance	The majority of KPIs that fail the target but within the 10% tolerance	All KPIs achieve the target
<b><u>Section 3 - Measures</u></b>	Fail the target by more than 10% tolerance	Fail the target but within the 10% tolerance	Achieve the target

## Appendix 4. Detailed thresholds for Red, Amber, Green ratings

Metric	Red	Amber	Green
Cdiff Actual	Failed Target by more than 10%	Failed Target but by less than 10%	Achieved Target
