

Jewellery Pouch

You will need:

- A men's tie
- Scissors
- Sewing machine unless hand sewing in which case needle and thread 😊
- Press stud or button closure

1. Snip the tack stitches from the back of the tie and remove any labels.

2. Cut the tie to the size pouch that you want.

3. Open up the tie and stitch (or fabric glue) the raw edge to stop it fraying

4. Turn it inside out and stitch along the bottom

5. Stitch a piece of ribbon inside that is enough length to tie a ring or necklace onto.

6. Finish with a press stud or closure; if you use a button you can do a simple loop or elastic to be sure it stays closed.

7. And you can embellish if you wish.

And that's it 😊
